PROFESSIONAL SUMMARY

Fullstack Developer with solid experience in software engineering and scalable interface architecture. Broad knowledge of front-end frameworks and libraries, operating in high-complexity corporate environments. Efficient, proactive, and fast-learning professional. Analytical capacity for API integration, critical evaluation of codebases, frontend architecture review, and technical documentation. Practical experience using Artificial Intelligence tools, such as GitHub Copilot, for development acceleration, logic validation, and refactoring, ensuring high standards of quality, scalability, and adherence to market best practices.

TECHNICAL SKILLS

- **Languages & Frontend:** Angular, RxJS, TypeScript, JavaScript, SCSS/SASS, React.js, Styled Components, Docusaurus, HTML5, CSS3, Bootstrap, Material UI.
- **Backend & Databases:** Node.js, Python, PHP, Express, MySQL, SQLite, Strapi.
- **Architecture & Code Evaluation:** Code Review, Clean Code, Edge Case Analysis, System Scalability.
- **Tools & Methodologies:** GitHub Copilot, Git, GitLab, CI/CD, Scrum, Kanban (BMAP), Jenkins, SonarQube, Figma, Advanced English.

PROFESSIONAL EXPERIENCE

Fullstack Developer / Architectural Integration

Cast Group | Banco do Brasil

Sep 2023 - Present

- Strategic role within the Architectural Integration team, developing, maintaining, and evaluating the bank's internal portals and systems.
- Robust frontend integration with complex APIs, orchestrando operations and actively collaborating with cross-functional team projects.
- Development of user interfaces matching Figma prototypes, applying advanced preprocessors (SCSS/ SASS) and utilizing institutional component libraries.
- Hands-on experience executing deployments across development, staging, and production environments.
- Continuous code evaluation and review, ensuring scalability, maintainability, and compliance with institutional engineering standards.
- Utilization of GitHub Copilot for workflow optimization, critical solution analysis, and technical delivery acceleration.
- Active participation in agile rituals (Scrum) and story/activity management via Kanban boards with BMAP.

React / Node.js Developer

Martins Advogados Associados

Nov 2022 - May 2023

- End-to-end development of a legal process control system, client management, and automated generation of contracts and minutes.

Fullstack Developer & IT Consultant

Freelancer

Jun 2022 - Present

- Architecture and development of scalable web systems and institutional websites, translating business requirements into precise technical solutions.
- Assembly and maintenance of computers, notebooks, and networks.
- Provision of IT services for outsourcing companies.

Computer Support Analyst

E2S Corretora de Seguros LTDA-ME

Sep 2020 - Aug 2022

- IT support, customer service, and digital certificate issuance (AGR - Registration Agent).
- Employee training and document analysis.
- Development of the company's portfolio website and internal web system.

EDUCATION

- **B.S. in Analysis and Systems Development** - Estácio (In Progress)
- **B.S. in Information Systems** - IFCE

PERSONAL PROJECTS & PORTFOLIO

Process Management System: Fullstack architecture and development featuring state management and API integration. [React, Styled Components, Node.js, Express]

SisCert E2S: Operational portal for lifecycle control and expiration tracking of requests and documents. [HTML, SCSS, JavaScript, PHP, MySQL]

Personal Portfolio: Website built to showcase professional projects, experiences, and skills. [React JS, Styled-Components, Bootstrap]

React Rick and Morty: Application displaying characters by consuming the official series API. [React JS, JavaScript, Bootstrap]

Marvel Comics: Comic book display consuming the Marvel API, focused on componentization practices. [React JS, Styled-Components, Ant Design]

E2S Portfolio: Digital catalog for displaying corporate products and services. [HTML, CSS, JavaScript, Bootstrap]
