

RAFAEL CANDIDO LACERDA CARVALHO

rafaskyplay@gmail.com | (88) 996814509 | linkedin.com/in/rafaelcarvalho-ti/ | github.com/rafaelcarvalho-git

PROFESSIONAL SUMMARY

Fullstack Software Engineer with a specialized focus on Front-End architecture and scalable interfaces. Operating in high-complexity corporate environments, bridging the gap between robust backend systems and highly optimized user experiences. Analytical capacity for complex API integration, critical codebase evaluation, and technical documentation — paired with practical experience using AI tools like GitHub Copilot for development acceleration, logic validation, and refactoring. Commitment to quality, scalability, and adherence to engineering best practices — from the first commit to production deployment.

TECHNICAL SKILLS

- **Languages & Frontend:** Angular, React.js, RxJS, TypeScript, JavaScript, Axios, SCSS/SASS, Styled Components, Docusaurus, HTML5, CSS3, Bootstrap, Material UI.
- **Backend & Databases:** Node.js, Express, MySQL, SQLite, Strapi.
- **Architecture & Code Evaluation:** Code Review, Clean Code, Testing, System Scalability.
- **Tools & Methodologies:** GitHub Copilot, Git, GitLab, CI/CD, Scrum, Kanban (BMAP), Jenkins, SonarQube, Figma, Advanced English.

PROFESSIONAL EXPERIENCE

Fullstack Developer

Cast Group | Banco do Brasil

Sep 2023 - Present

- Strategic role in the Architectural Integration Team — developing, maintaining and evaluating the bank's internal portals and systems.
- Robust frontend integration with complex APIs, orchestrating operations across cross-functional teams.
- Built UIs matching Figma specs using advanced preprocessors (SCSS/SASS) and institutional component libraries.
- Hands-on deployments across dev, staging and production environments.
- Continuous code review ensuring scalability, maintainability and compliance with institutional standards.
- Use of GitHub Copilot for workflow optimization and accelerated technical delivery.
- Active participation in agile rituals (Scrum) and story/activity management via Kanban boards with BMAP.

Front-end React / Node.js Developer

Martins Advogados Associados

Nov 2022 - May 2023

- System Architecture & Design: End-to-end development of a comprehensive legal process control and client management system, responsible for elaborating the UI/UX design and ensuring seamless integration with the back-end services.
- Fullstack Engineering & Operations: Active participation in back-end development and logic implementation, delivering automated features for law firm management, including process tracking, collaborator management, and document generation, significantly reducing manual administrative workloads.

Computer Support Analyst & Web Developer

E2S Corretora de Seguros LTDA-ME

Sep 2020 - Aug 2022

- IT support, customer service and digital certificate issuance (AGR — Registration Agent).
- Employee training, document analysis and development of the company's portfolio website and internal system. .
- Development of the company's institutional portfolio website and a custom internal system to streamline administrative workflows.

Fullstack Developer & IT Consultant

Freelancer

Ongoing

- Architecture and development of scalable web systems, leveraging AI-powered prototyping and design tools to accelerate visual concepting and delivery.
- Assembly and maintenance of computers, notebooks and networks for outsourcing clients.
- Comprehensive IT consulting, encompassing infrastructure planning, technical advisory, and the assembly and maintenance of hardware and network environments for corporate clients.

EDUCATION

- **B.S. in Analysis and Systems Development** - Estácio (In Progress)
- **B.S. in Information Systems** - IFCE

PERSONAL PROJECTS & PORTFOLIO

Advocacy System: System to manage law firm, staff, and legal cases. Includes features that help reduce manual work for employees. [React, Styled Components, Node.js, Express]

SisCert E2S: Operational portal for lifecycle control and expiration tracking of digital certificates. [HTML, CSS, JavaScript, PHP, MySQL]

Portfolio Academia Angular: Portfolio website to display modalities, plans, and information for a gym. [Angular, Typescript, Bootstrap, SCSS]

React Rick and Morty: Web application focused on cataloging and searching for information about the show's universe using The Rick and Morty REST API. [React JS, JavaScript, Bootstrap]

RapDrink Mobile: A mobile app that connects consumers to premium drink vendors. It allows users to locate partners in real time, check distances, and map routes instantly. [React Native, Expo, Styled-Components, React Native Maps]

E2S Portfolio: Institutional and portfolio website to display products, services, and customer service channels for an insurance broker and digital certifier. [HTML, CSS, JavaScript, Bootstrap]

Portfolio Dev Rafael Carvalho: My personal portfolio, featuring my professional journey in software engineering and my commitment to high-quality, AI-assisted development. [Angular, Typescript, SCSS]
